## Volumes and Values of Domestic Tourism in Great Britain – 2015

Tourism by residents of Great Britain in 2015: this report presents the principal findings of the Great Britain Tourism Survey (GBTS). This survey replaces the previous United Kingdom Tourism Survey (UKTS).

GBTS is jointly sponsored by VisitEngland, VisitScotland and Visit Wales (the Tourism Department of the Welsh Government).

# Introduction

This report is the twenty-seventh in an annual series, published to present statistical information on the volume and value of domestic tourism. Prior to 2011, this had focussed on tourism undertaken by the resident population of the United Kingdom to destinations within the UK and the Republic of Ireland. However, since 2011 the scope has covered only the resident populations of Great Britain (England, Scotland and Wales) and trips within these jurisdictions. Northern Ireland data is collected in a separate survey by Northern Ireland Tourist Board.

Consequently, special care must be taken when interpreting trends in domestic tourism to ensure that a consistent base is used throughout. In this case, all pre-2010 data has been recalculated to exclude Northern Ireland as a destination and also to exclude all tourism into Great Britain by Northern Irish residents from the analysis. This provides a consistent basis for trend analysis but means that the data published for 2006-2010 in this report is different from that published in previous editions of 'The UK Tourist', prior to 2011.

All information in the 2015 report comes from a face-to-face interview survey commissioned jointly by the national tourist boards, VisitEngland (VE), VisitScotland (VS) and Visit Wales (the Tourism Department of the Welsh Government). The joint survey is called the Great Britain Tourism Survey (GBTS).

Under its previous guise of the United Kingdom Tourism Survey (UKTS), this was first conducted in 1989 and replaced earlier surveys which the national tourist boards had used to obtain estimates of domestic tourism volume and value. Until 1999, the survey was based on in-home interviews with adults, mainly using a random omnibus survey conducted by NOP Research Group. This survey vehicle for UKTS was discontinued at the end of 1999. A review was then undertaken to select a new research methodology, while maintaining a high degree of consistency in the key principles of the survey design.

In 1999, a five-year contract covering the period 2000-2004 was awarded to BMRB International and in 2000, UKTS switched to a new research methodology based on telephone interviews using random digit dialling. By 2003 and 2004 however, significant concerns were being expressed relating to the UKTS derived data on domestic tourism. Following a further extensive review, UKTS returned to the previous (pre-2000) methodology for measuring the volume and value of domestic overnight trips: face-to-face interviews conducted in-home. TNS was appointed to undertake the survey from May 2005 and for the period 2006 – 2010. The sponsors (the various UK national tourism organisations) concluded that the approach proposed by TNS would yield a more representative sample of the UK population by using a proven face-to-face interview approach instead of the previous random digit dialling telephone approach.

In 2010, TNS was re-appointed to undertake the survey for a further five years from 2011-2015. With the removal of Northern Irish residents and Northern Ireland as a destination from the scope, the survey was re-launched as the Great Britain Tourism Survey. The approach remains identical to UKTS 2006-10 however:

- 100,000 face-to-face interviews per annum, conducted in-home, more than twice the sample size featured in the previous telephone based survey methodology
- A weekly sample size of around 2,000 adults aged 16 years or over – representative of the GB population in relation to various demographic characteristics including gender, age group, socio-economic group, and geographical location
- Respondents are asked about any overnight trips taken in the last four weeks, as opposed to a 12-weeks' recall period (covering the three preceding calendar months) under the previous methodology

- The questions were first added to TNS's Omnibus survey on 4th May 2005 and the survey outputs provide continuous data from May 2005 for total number of trips, nights spent, breakdown of expenditure, purpose of trip, accommodation used and party composition on each trip by destination

Because of these changes in methodology, the GBTS/UKTS results gathered since 2005 are not comparable with those from previous years. In addition, given that the survey fieldwork did not begin until May 2005, no survey data was collected for the first four months of the year, January-April. Consequently, the survey data for 2005 is 'part-year' in nature – only covering the May-December period. Comparative data is therefore restricted to 2006 only. All of the 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014 and 2015 data covers the full 12-month period, allowing for valid comparison.

## Objectives

The first objective of GBTS is to provide measurements of tourism by residents of GB, in terms of both volume and value. The second is to collect details of the trips taken and of the people taking them.

These objectives extend to:

- Tourism by people of any age. The core survey is based on adults but collects details of all adults and children present on the trip
- Tourism for any purpose. Although the report places considerable emphasis on the important holiday sector, this is not just a holiday survey. Also included within the scope is tourism for the purpose of visiting friends and relatives, for work or business purposes, conferences and exhibitions, or indeed almost any other purpose
- Day excursion trips, not involving an overnight stay away from home, are not covered by the survey at all
- Tourism to any part of GB, using any accommodation type

GBTS is designed as a continuous measurement of the volume and value of domestic tourism by residents of GB, in such a way as to provide absolute estimates at any point in its currency and relative change over time. Three separate but associated measurements are required from the survey:

- The number of trips (including child trips) taken by GB residents
- The number of bednights (including child nights) spent away from home on these trips
- The value of spending on those trips

In summary, for the purposes of this survey, tourism is taken to be any journey away from home lasting one or more nights, to any destination within GB, by any mode of transport, for any purpose, and staying in any type of accommodation. These topics of destination, purpose, mode of transport, accommodation type and many others, are included in the information collected by the survey, in order to provide meaningful analysis and descriptions of the volume and value estimates.

Using previous methodologies, an upper limit of 60 days was applied to the number of nights spent away from home to qualify as a tourism trip. As respondents are now asked about trips returned from in the four weeks prior to interview, this upper limit is now redundant and no longer applied.

It is worth noting that despite this, results are reported on the basis of the start date of the trip.

## Scope of this report

This document is intended to provide all of the information necessary to form an overview of the total GB domestic overnight tourism market. The reader will therefore find details of familiar subjects such as purpose, destination, accommodation, transport and month of trip. Also included are other subjects such as methods of booking or arranging travel and details of the types of location stayed at while away from home.

Inevitably, a publication of this size is selective. The 'core' results of each year's GBTS run into thousands of pages of computer tabulations, which are held by the sponsoring boards. Beyond these core tabulations, further computer analysis can provide – subject to technical limitations – any permutation of any number of parameters contained in the survey, in order to produce data on specific market sectors not already analysed. Survey results not published in this report are available from any of the sponsoring boards. Further information and details of costing can be obtained from any of the survey sponsors, at the addresses shown at the back of this report.

For 2011 to 2015, a similar report has been produced from the Great Britain Day Visits Survey (GBDVS) covering same-day tourism. For comparability and consistency, results have been presented in a similar format in both the 'GB Tourist' and the 'GB Day Visitor'.

## Survey method

The GBTS survey is conducted continuously throughout the year, using face-to-face Computer Assisted Personal Interviewing or CAPI, as part of TNS's in-home omnibus surveys. Weekly omnibus surveys are conducted with a representative sample of 2,000 adults aged 16 and over within GB. Respondents are asked whether they have taken trips in Britain in the previous four calendar weeks that involved at least one night away from home.

When such trips are identified, further questions are asked about a maximum of three trips – the most recent three trips – with a core set of questions for all three trips and additional questions for the most recent trip. The questionnaire is thus designed to maximise accuracy of recall, whilst minimising the task for those who have undertaken more than one trip.

The requirement is for a complete dataset for each of the three most recent trips. Therefore, some imputation is necessary and that imputation covers data not collected, or otherwise missing.

The results are reported in terms of total GB population values. Therefore the data are weighted to correct for differences between the sample distribution and that of the population and also to gross the sample values up to the total population.

Reporting periods are defined in terms of groups of weeks. Results published from the data are for trips that started in each calendar month.

The sample design is based on a master sample frame which divides GB into 600 sample points, with a further five sample points north of the Caledonian Canal. The TNS omnibus survey operates using two sets of points which are used on alternate weeks. Each set consists of 162 points within GB. These sets of points are further split into four levels of 118, 133, 152 and 162 which are used depending on the interview length. Sampling points are selected after stratification by Government Office Region and Social Grade. Each sample point is divided into geographical halves. Selected addresses from the point are taken from one half the first time it is used and from the other half when it is next used. This provides for de-clustering or geographical dispersion week on week. Within each point, 130-200 addresses are issued

from the Postal Address File and these consist of one or more Output Area. Depending on the interview length, a target to achieve an adult sample of 13 to 18 completed interviews is set (12 to 15 in London).

Interviewer assignments are conducted over two days of fieldwork and are carried out on weekdays between 2pm-8pm and/or at the weekend. Interviewers are issued with quota targets based on gender, working status and presence of children. All interviewers must leave three addresses between each successful interview.

On average 2,000 interviews are conducted each week, some 100,000 interviews per year. Interviewing is not normally conducted during the two weeks either side of Christmas. The weighting procedures are amended to compensate for these missing weeks.

It was decided to retain the question wording used in UKTS from 2005-2010 to ensure consistency of data collection (see below). However, subsequent trip details are only collected for trips taken within GB in the preceding four weeks. The questionnaire reads:

“We would like to ask you about overnight trips you have taken in the UK and Ireland recently. We are interested in ALL overnight trips taken for whatever reason, including holidays, visits to friends and relatives, business trips and so on.

Q1. Have you returned from any trips in the past four weeks that involved staying away from home for one night or more at a destination within the UK or the Republic of Ireland?

In this survey, by the UK, we mean anywhere in England, Scotland, Wales, Northern Ireland, the Channel Islands, the Isle of Man or any of the other islands which are part of the United Kingdom.

The four weeks we are talking about are from Monday (day/month) through to last Sunday (day/month).

Please include any trips taken where the main destination was abroad but where you stayed away from home in the UK or Ireland as part of that trip.”

It should be noted that although the questionnaire (at Q.1) clarifies to the respondent that the Channel Islands and Isle of Man are included within the United Kingdom, all parties involved with the survey are aware that these islands have federacy status and are not part of the United Kingdom.

The change in the method of data collection from telephone interviewing to an in-home face-to-face approach utilising TNS's weekly Omnibus survey in May 2005, necessitated a review of the questionnaire to adapt it for CAPI use. In addition, the client group was keen to rationalise the length of the questionnaire and remove questions no longer deemed essential.

## This report

Section 1.1 – 2015 general trends – this section interprets some of the key differences in domestic tourism in 2015 when compared to 2014.

Section 1.2 – 2015 full year summary – an in-depth summary of domestic tourism during 2015.

Section 1.3 – 2011-2015 trends in domestic tourism – this section focuses on trends during the previous five years, examining GB holiday, visiting friends and relatives (VFR) and business tourism. Also included within this section are the following:

- Trends in expenditure over the period, including a detailed breakdown of expenditure by the different spend categories of a trip i.e. accommodation, travel etc.
- GB holidays by lifestage – this section looks at domestic holidays in Britain during the 2010-2015 time period, when analysed by different lifestage segments (Families, Empty Nesters etc.)
- All spend figures quoted throughout the report are presented as historic prices and do not take inflation into account, with the exception of tables 1.1.1 to 1.1.4, where the spend figures have been adjusted to account for inflation

## Section 2

A much more in-depth understanding of the characteristics of domestic tourism in GB.

The GBTS reports in terms of trips, nights and spending:

- Trips are trips or journeys away from home involving an overnight stay, taken by adults aged 16 and over and accompanying children aged up to 15. It should be noted that each adult or child present on the trip counts as a trip. Thus a family of two adults and two children taking a trip away would count as four trips
- Bednights are the number of nights away taken by adults and accompanying children on these trips. Each night away spent by an adult or a child present on the trip counts as a night. Thus, a family of two adults and two children taking a three night trip away from home would count as 12 bednights
- Spending is the expenditure relating to these trips. It includes costs paid in advance of the trip, costs paid during the trip itself and also any bills relating to the trip received after returning home. It covers costs paid by adults on the trip for themselves and on behalf of others on the trip, including children. It also includes costs paid on behalf of the person taking the trip, such as an employer paying the cost of a business trip
- Two further points about spending may be helpful:
  - average expenditure per night is calculated by dividing the total trip costs by the number of nights. The total trip costs include those which are paid in advance of the trip (such as travel and inclusive package trip charges) as well as costs incurred on a daily or nightly basis during the trip
  - analysis of expenditure by country of destination allocates all trip costs to the country of destination, although in reality some of these costs may be paid in the country of residence rather than the country of destination

For simplicity, absolute volumes and values have been rounded. The degree of rounding is generally self-evident in the tables, but where appropriate, an explanatory note has been added for clarity. The appendix contains a detailed set of definitions of terms used in the report.

# Part 1 – Interpretation

GB Tourist 2015

# Part 1 – Interpretation

## Section 1.1 – 2015 general trends

### Tourism in Great Britain in 2015

The tables below and overleaf shows that during 2015 the overall volume of trips taken in GB increased by +9% to 124.4 million. The number of bednights spent during GB trips in 2015 increased by +8% to 377.1 million. Expenditure on GB overnight trips also rose during 2015, increasing by +9% to £24.8bn. The volume of holiday trips has risen +6% since 2014, to 56.0m, while visits to friends and relatives increased by +10% to 46.6 million. The volume of business trips taken during 2015 has increased by +4% compared to 2014, rising to 16.5 million trips.

#### All domestic overnight tourism

	Trips			Bednights			Expenditure		
	2014	2015	% change	2014	2015	% change	2014	2015	% change

## England trips, nights and expenditure

During 2015, 102.7 million domestic overnight trips were taken in England, with 299.6 million bednights and expenditure of £19.6 billion. These are increases compared to 2014; trips were up +11%, bednights rose by +10% and expenditure by +8%. The number of holiday trips showed signs of recovery after the declines seen in 2014, while the volume of trips to visit friends and relatives was at its highest point since 2006. The volume of business trips in England was similar to 2014, and lower than most of the previous years.

2015 generally saw growth across all months of the year compared to 2014, though the largest percentage increases were seen in January and March, which are relatively low volume months.

Figure 1 – % change in volume of domestic trips in England – 2014 versus 2015

\*Please note that in the fourth quarter of 2014 there were fewer than 2,000 useable interviews in some weeks. This was due to fieldwork taking longer than expected, and therefore some interviews were not conducted in the intended week. This resulted in base sizes for October, November and December 2014 being smaller than for the same months in previous years, and therefore the base sizes for the whole of 2014 are also smaller than previous years. There were insufficient remaining interviews to create reliable and robust data for reporting October, November and December 2014 as separate months, so the decision was taken to combine the available interviews into a single Quarter 4 time period.

A more detailed explanation of the fieldwork issue is contained in the GBTS 2014 Methods and Performance Report (page 15).

**Table 1.1.2 – England trips, nights and expenditure by purpose – 2006 to 2015**

### Scotland trips, nights and expenditure

In Scotland, 12.0 million domestic tourism trips were taken during 2015, with 41.3 million bednights and expenditure of £3.3 billion. The volume of trips fell by -4%, bednights decreased by -1%, while expenditure rose by +14%. The volume of holiday trips in Scotland during 2015 was fairly similar to 2014, while trips to friends and relatives saw a -14% decrease.

Declines were evident in 6 months during 2015, with the most notable being in October to December. There was a period of growth at the start of 2015, particularly January, which saw +86% increase upon volumes seen for the same period in 2014.

### Wales trips, nights and expenditure

Around 10.4 million domestic tourism trips were taken in Wales during 2015, staying for 36.2 million bednights and spending £2.0 billion. These are the highest levels of Welsh domestic overnight tourism seen in the past 10 years. There was a +4% increase in trips, a +3% rise in bednights and a +14% increase in expenditure. The increases were driven by a boost to domestic business trips in Wales, up +70% compared to a lean year in 2014, while holiday trips and trips to see friends and relatives experienced small decreases across 2015 (-2% for both).

Across the months during 2015 Wales saw a mixed performance, with notable year-on-year increases for January, March, June and during the last quarter. February and September, however, saw declines compared to 2014.

Figure 3 – % change in volume of domestic trips in Wales – 2014 versus 2015

### Completing the picture

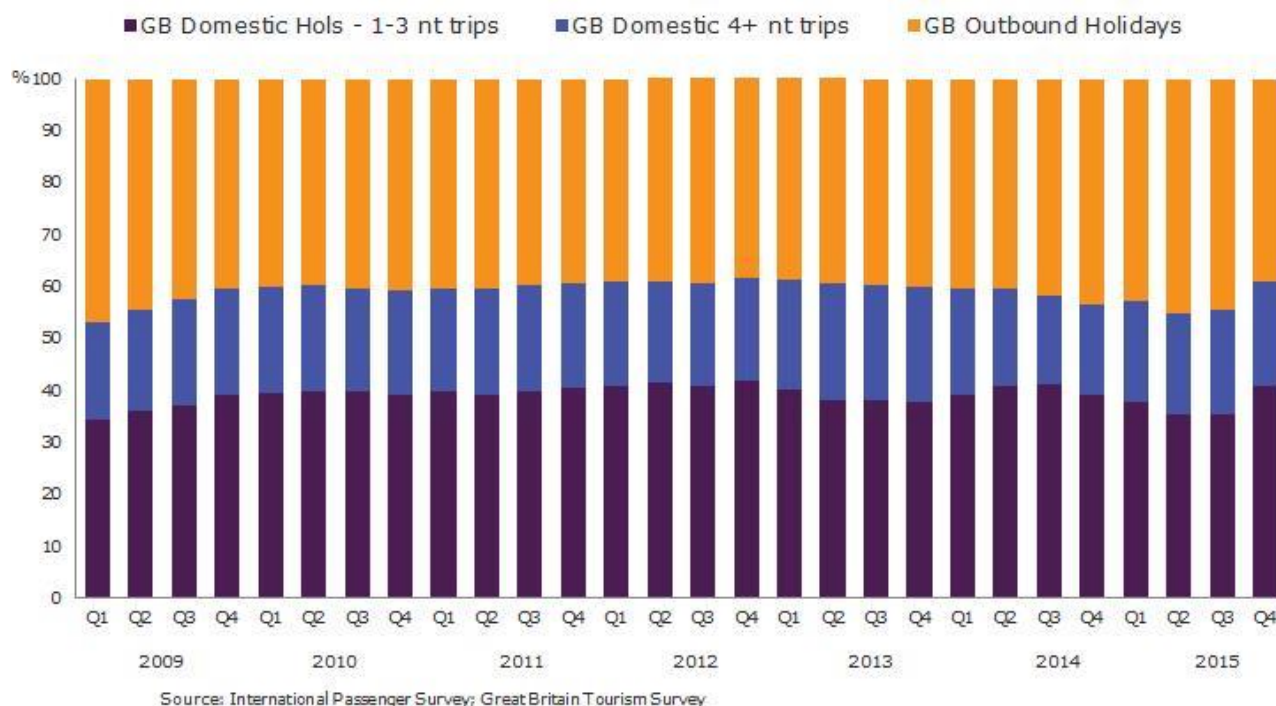

It is important to understand the performance of domestic tourism – and particularly domestic holidays, within the broader context of holiday taking by GB residents generally – both at home and overseas. Since the success for domestic holidays in 2009, the volume of trips taken within GB has fluctuated. Over 2015, holiday trips have increased by +6% after several years of decline. The number of overseas trips taken declined sharply from 2008 to 2010, dropping from 46 million to 36 million. Since 2013, however, this trend has been reversed with steady increases seen in the volume of holiday trips taken abroad by UK residents, with the 2015 marking a +9% increase in overseas trip levels. Volumes of overseas trips are now approaching levels seen in 2008, before the global financial crisis.

**Table 1.1.5 – Holiday trip taking by GB residents**

Destination	GB residents' holiday trips in GB		UK residents' holiday trips overseas*	
	Total trips (m)	% change on previous year	Total trips (m)	% change on previous year
2008	50.416		45.531	
2009	58.973	+17.0%	38.490	-15.5%
2010	54.472	-7.6%	36.126	-6.1%
2011	58.433	+7.3%	36.356	+0.6%
2012	57.696	-1.3%	36.364	0.0%
2013	56.969	-1.3%	36.932	+1.6%
2014	52.903	-7.1%	38.519	+4.3%
2015	55.960	+5.8%	42.153	+9.4%

\* Source: International Passenger Survey (Please note: Data for UK residents)

Overall, as illustrated below, the share of domestic holidays vis-a-vis outbound holidays has reduced to 55% during Q2 of 2015 but recovered to 61% by the end of the year.

## Section 1.2 – 2015 full year summary

### Tourism volumes and values in 2015

During 2015, GB residents took around 124 million trips of one night or more within GB. These trips involved a total of 377 million nights away from home, resulting in an average tourism trip length of three nights.

Tourism expenditure on these domestic trips was around £25 billion, representing an average spend of £200 per trip and £66 per night away from home.

By relating these levels of tourism volume and value to the total population, the average level of tourism per head of population can be calculated.

In 2015, the average GB adult resident:

- Took two tourism trips of one night or more away from home within GB
- Stayed away from home for approximately three nights per trip
- Spent in the region of £200 per trip

### Tourism destinations

This section looks in detail at tourism in GB, and compares the performance of England, Scotland and Wales as destinations.

Over four out of five (82%) British trips taken during 2015 were taken in England (102.7 million). Scotland saw 12.0 million trips during 2015 and a 10% share of British trips, while there were 10.4 million trips taken in Wales, with a share of 8%.

**Table 1.2.1 – Tourism trips in GB by country**

Destination	Trips	Share of trips
	Millions	%
<b>GB total</b>	<b>124.426</b>	<b>100%</b>
England	102.730	82%
Scotland	11.988	10%
Wales	10.449	8%

When looking at the proportion of trips taken compared to each nation's population as part of Britain, England has a smaller share of trips taken than its share of the overall population, while Scotland and Wales both have a higher proportion of GB trips taken when compared to their population share.

**Table 1.2.2 – Tourism trips compared with population**

Destination	Population		Trips	
	Millions	%	Millions	%
<b>GB total</b>	<b>63.086</b>	<b>100%</b>	<b>124.426</b>	<b>100%</b>
England	54.614	87%	102.730	82%
Scotland	5.365	9%	11.988	10%
Wales	3.107	5%	10.449	8%

Source: June 2014-based national population projections, office for national statistics

Tourism trips taken in England during 2015 were around 2.92 nights in duration on average. The average length of trips taken in Scotland and Wales was longer, with 3.45 nights for Scottish trips and 3.46 nights being spent on trips in Wales.

**Table 1.2.3 – Tourism nights in GB by country**

<b>Destination</b>	<b>Nights Millions</b>	<b>Share of nights %</b>	<b>Average nights per trip</b>
<b>GB total</b>	<b>377.101</b>	<b>100%</b>	<b>3.03</b>
England	299.569	82%	2.92
Scotland	41.336	10%	3.45
Wales	36.197	8%	3.46

With regard to spending on tourism trips, across Britain as a whole, trips cost an average around £200. Scotland saw slightly higher trip values, with trips costing on average £274. Trips to Scottish destinations typically see higher spend figures as they tend to be longer than trips taken elsewhere and involve longer journeys. Trips to Wales had the lowest average spend, with trips costing on average £189, despite longer trip lengths (3.46 nights per trip on average). Therefore, spending per night is notably lower in Wales than in England and Scotland.

**Table 1.2.4 – Tourism spending in GB by country**

<b>Destination</b>	<b>Spending Million</b>	<b>Share of spending %</b>	<b>Average spend per trip</b>	<b>Average spend per night</b>
<b>GB total</b>	<b>£24,825</b>	<b>100%</b>	<b>£199.52</b>	<b>£65.83</b>
England	£19,571	82%	£190.51	£65.33
Scotland	£3,279	10%	£273.52	£79.33
Wales	£1,975	8%	£189.01	£54.56

## Purpose by destination

This section illustrates the primary purpose of tourism trips taken by British residents within GB in 2015 – be this for a holiday, visiting friends & relatives or travelling for business and work.

Trips taken as a holiday tend to make up the greatest proportion of overnight British trips, with most of these being shorter trips of 1-3 nights in length. There are some variations between the nations, however, and for Wales the proportion of total holiday trips (including VFR-Holidays) is notably higher than for England and Scotland (78% versus 67% for England and 72% for Scotland). Holiday trips in Scotland and Wales were also more likely to be longer (4+ nights) than those taken in England, comprising 29% and 30% respectively of trips taken, compared to 20% in England.

Trips for the purpose of visiting friends and relatives (VFR) were more common in England, where 39% of trips were taken for this reason compared to 29% in Scotland and 27% in Wales.

Business trips were taken less frequently in Wales, with 9% of the trips in Wales having been taken for this reason, while in England and Scotland the proportion was higher at 13% and 12% respectively.

**Table 1.2.5 – Trips in GB by purpose**

	England	Scotland	Wales
<b>Purpose</b>	<b>Million</b>	<b>Million</b>	<b>Million</b>
<b>Total</b>	102.730	11.988	10.449
<b>Total holiday (including VFR-holiday)</b>	<b>68.920</b>	<b>8.660</b>	<b>8.188</b>
1-3 nights (total holidays)	48.183	5.241	5.056
4+ nights (total holidays)	20.738	3.419	3.132
Holiday	43.724	6.364	6.251
VFR	40.552	3.461	2.793
VFR-holiday	25.196	2.296	1.938
VFR-other	15.356	1.165	0.855
Business/work	13.868	1.494	0.901
<b>Purpose</b>	<b>% share</b>	<b>% share</b>	<b>% share</b>
<b>Total</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>
<b>Total holiday (including VFR-holiday)</b>	<b>67%</b>	<b>72%</b>	<b>78%</b>
1-3 nights (total holidays)	47%	44%	48%
4+ nights (total holidays)	20%	29%	30%
Holiday	43%	53%	60%
VFR	39%	29%	27%
VFR-holiday	25%	19%	19%
VFR-other	15%	10%	8%
Business/work	13%	12%	9%

Bednights show similar characteristics to those in the analysis of trips across the different countries. As noted above, Scotland and Wales have a higher share of nights than trips, driven by a longer average trip length (3.46 nights for Wales and 3.45 nights for Scotland versus 2.92 nights per trip to England). This longer average length is mainly due to the higher share of trips accounted for by longer holidays in Scotland and Wales.

**Table 1.2.6 – Nights in GB by purpose**

### Origin and destination of trips

This section examines the origin of trips, meaning the GB countries in which those who are taking the tourist trips are normally resident.

Residents of England took 109 million trips in 2015, a share of 88% of all British trips, while Scots took around 9 million and Welsh residents 6 million trips.

The share of trips taken by residents of each nation is broadly in line with their share of the British population, as the average number of trips being taken by residents is fairly similar – averaging around two trips per resident across each of the British nations.

**Table 1.2.8 – Trips taken by country of residence**

Residents of...	<b>GB</b>	<b>England</b>	<b>Scotland</b>	<b>Wales</b>
Trips taken (million)	124.426	108.995	9.386	6.045
Share of trips taken (%)	100%	88%	8%	5%
Resident population (million)	63.086	54.614	5.365	3.107
Share of population (%)	100%	87%	9%	5%
Average number of trips taken per resident	1.97	2.00	1.75	1.95

British residents spent on average just under six nights away on GB trips in 2015 (across the two trips average taken) and spent on average £394 on these trips overall. Scottish and Welsh residents spent slightly fewer nights away than English residents (5.75 and 5.88 compared to 5.98). Scottish and Welsh residents spent rather more on trips each year, with an average of £405 and £433 respectively.

**Table 1.2.9 – Nights taken & spending by country of residence**

Residents of...	<b>GB</b>	<b>England</b>	<b>Scotland</b>	<b>Wales</b>
Nights away (million)	377.101	328.015	30.830	18.256
Average number of nights taken per resident	5.98	6.01	5.75	5.88
Spending (£ million)	£24,825	£21,505	£2,172	£1,345
Average spend per resident (£)	£394	£394	£405	£433

The relationship between the country of origin and the country of destination for trips is shown in table 1.2.10.

**Table 1.2.10 – Destination of trip by country of residence (number)**

Residents of...				
<b>Trips</b>	<b>GB</b>	<b>England</b>	<b>Scotland</b>	<b>Wales</b>
<b>Destination</b>	<b>Million</b>	<b>Million</b>	<b>Million</b>	<b>Million</b>
GB	124.426	108.995	9.386	6.045
England	102.730	95.216	3.514	4.000
Scotland	11.988	5.989	5.842	0.157
Wales	10.449	8.391	0.097	1.960

Nine out of every ten trips (87%) taken by English residents were within England, with trips to Scotland and Wales making up 5% and 8% of English residents' trips respectively. Residents of Scotland were most likely to take trips within their own nation (62% of trips taken by Scottish residents were in Scotland), nearly two fifths (37%) took trips in England. In contrast to England and Scotland, trips made by Welsh residents were most likely to have been taken outside of their home nation with two thirds being taken in England (66%). Around a third of trips taken by Welsh respondents were in Wales.

**Table 1.2.11 – Destination of trip by country of residence (share by origin)**

Residents of...				
<b>Trips</b>	<b>GB</b>	<b>England</b>	<b>Scotland</b>	<b>Wales</b>
<b>Destination</b>	<b>Million</b>	<b>Million</b>	<b>Million</b>	<b>Million</b>
GB	100%	100%	100%	100%
England	82%	87%	37%	66%
Scotland	10%	5%	62%	3%
Wales	8%	8%	1%	32%

In the tables below, both bednights and spending show similar patterns when looking at share by destination:

- English residents generate 87% of trips, 91% of nights and 91% of spend on domestic trips taken in England
- For Scottish residents, equivalent figures for Scotland are 62% of trips, 40% of nights and 35% of spend
- And for Welsh residents, the proportions are 32%, 15% and 14% respectively

The further people travel, the more nights they are likely be away and the higher their spend is likely to be. Therefore, people taking a trip outside their country of residence will tend to account for a higher proportion of nights and spend, and those taking a trip within their country of residence will make up a lower proportion of nights and spend.

Table 1.2.16 presents analysis of the extent to which each country is a net 'winner' or 'loser' in terms of domestic tourism. For example, if residents of country X take 10 trips outside country X, in countries Y and Z, but 12 trips are taken in country X, by residents of countries Y and Z then country X has a net gain of two trips.

Both Scotland and Wales have more domestic tourism trips, nights and expenditure from elsewhere in Britain than residents of those countries who take trips to other parts of Britain. The converse is true for England, with a net loss in numbers of trips, nights and spend versus the rest of Britain.

**Table 1.2.16 – Net gains/losses of domestic tourism**

	Trips <b>Millions</b>	Nights <b>Millions</b>	Spend <b>£millions</b>
England	-6.866	-28.446	-£1,933
Scotland	+2.535	+10.505	+£1,106
Wales	+4.331	+17.941	+£827

## GB Regions – All tourism – Analysis by region of residence and region visited

Tables 1.2.17 and 1.2.18 show that, with the exception of London, the greatest proportion of trips made in each region is made by residents of the same area. The origins of visitors to London were slightly more diverse, drawing visitors from a wider range of regions – more than nine out of ten (94%) overnight visits are made by non-London residents and therefore London sees a far smaller proportion of those who live in the region taking overnight visits there than do other regions.

**Table 1.2.17 – Overnight tourism: All tourism trips by region of residence and region visited (millions)**

In terms of bednights spent in each region (tables 1.2.19 and 1.2.20), Yorkshire and the Humber and southern regions of England tended to see a larger proportion of nights spent by those living in the same region. For other regions, including the West Midlands, London and North East larger shares of nights were spent by those from outside the region.

## GB Regions – Holiday trips – Analysis by region of residence and region visited

As with All Tourism Trips, Holiday Trips tended to have a notable proportion of trips being taken by people from the same region as residence. The exception being London, where visitors were more likely to have come from the South or from further regions. This pattern was also reflected in the number of bednights and expenditure within each region. Each region had its own residents accounting for the largest share of nights/spend, apart from London and Wales, where visitors from elsewhere made up a larger proportion (tables 1.2.23 – 1.2.28 below)

**Table 1.2.23 – Overnight tourism: All holiday trips by region of residence and region visited (millions)**

## Booking method and lead time analysis

### Trips booked by trip purpose

Nearly three in five (57%) trips undertaken in GB during 2015 were booked in advance of taking the trip. The proportion of trips booked in advance varied by the purpose of the trip. Holidays and business trips were more likely to be booked in advance (70% and 67% respectively), while VFR trips were less likely to be booked in advance (35%). When considering holiday trips, those to Wales were less likely to be booked in advance (60%) than those to Scotland (69%) or England (72%).

Note, in the table below, the percentages add to less than 100% in each case: a small proportion of respondents (typically 5-10%) were unsure about whether or not their trip had been booked in advance.

**Table 1.2.29 – Booking method by trip purpose**

Purpose	All trips		Holiday trips		VFR trips		Business trips	
	Million	%	Million	%	Million	%	Million	%

### Trips taken in GB by booking method

In table 1.2.30 it can be seen that 57% of GB trips in 2015 were booked in advance, but accounted for 71% of overall expenditure, because a higher proportion of more expensive trips were booked in advance than those costing less. In particular VFR trips tended to be less expensive and were also less likely to be booked in advance.

Overall, bookings made directly through the accommodation provider (e.g. hotel, B&B or cottage owner) account for the largest share of GB domestic overnight trips, with 39.0 million trips (31%) booked in this way. Bookings made in this way also accounted for a larger proportion of expenditure, accounting for two fifths (40%) of all bookings. The nights spent by each booking method broadly reflected the share of trips overall, with the largest share of nights spent on trips where the booking was made directly with the accommodation provider. Other popular methods of booking trips included bookings made through a transport provider (e.g. rail, air, sea or coach), accounting for 10% of trips, or through a high street or online travel agent (7%). Just under two fifths (38%) of trips are made without a firm booking, but account for less than a quarter (23%) of expenditure on GB trips overall.

**Table 1.2.30 – Booking method by volume of trips, nights and expenditure – Overall GB**

	Trips Million	Nights Million	Expenditure £Million
<b>Total</b>	<b>124.426</b>	<b>377.101</b>	<b>£24,825</b>

Don't know	7.169	22.357	£1,428

## GB trip volumes by booking methods and country visited

When comparing across different GB nations visited, there were similar proportions of visitors making firm bookings ahead of their trip, although Wales saw a slightly lower share (53% compared to 57% for GB overall).

In terms of the method of booking, going directly through the accommodation provider was the most popular choice across each of the nations, accounting for nearly a third in each (32% England, 31% Scotland and 30% Wales). Other methods of booking saw similar levels of take-up across the nations.

### Booking online versus other methods

The growth of the importance of online methods of booking GB overnight trips can clearly be seen in Tables 1.2.32 and Figure 4. Around three quarters of trips where a firm booking is made were booked online and the volume of trips booked online has doubled since 2006. Although the proportion of firm bookings made online has remained unchanged since 2014.

**Table 1.2.32 – GB trip volumes by booking method – trends over time**

	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015

	57%	52%	48%	43%	39%	34%	31%	29%	24%	24%

Figure 4: % of GB trips where a firm booking was made – online versus other methods

Figure 5 shows that in 2015 three quarters (76%) of all pre-booked trips were booked on line, unchanged from 2014. The proportion varied by the type of channel through which the booking was made and although fairly level, there was some difference between 2014 and 2015 in terms of proportion of online bookings made.

The highest levels of online booking were seen for those booking through a high street or online travel agent (e.g. Thomas Cook or Expedia) and over nine in ten (94%) of these trips were booked online. Booking accommodation through a transport provider was also highly likely to be made online (81%). Two thirds (66%) of those booking directly through an accommodation provider did so online, though this has fallen slightly compared to 2014 (73%). Tour operators had 66% of trip-takers booking online and tourist boards and information centres 74%.

Figure 5: % of 2015 trips vs 2014 trips booking made online - by type of provider

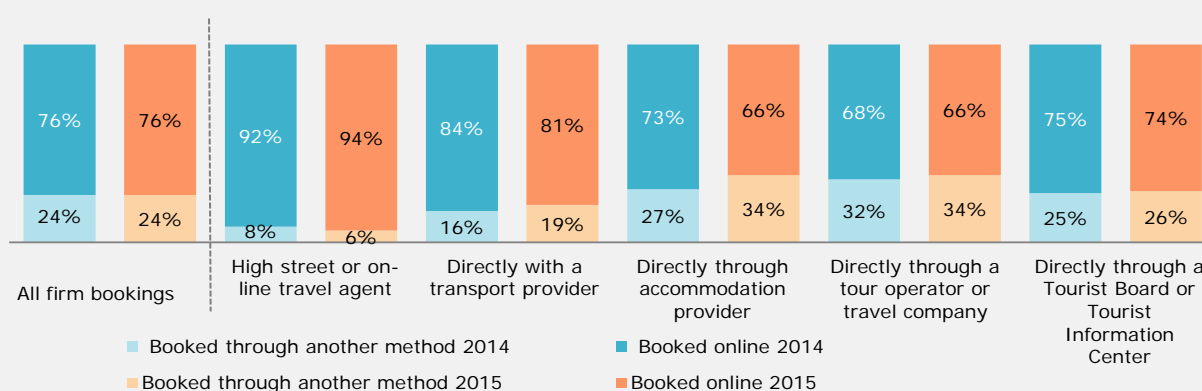

Figure 6 highlights that trip purpose did not have a significant impact upon propensity to book online or through other methods, with fairly consistent levels of take-up across all types. Business trips were more likely to be booked online, with more than four in five (83%) of pre-arranged trips being booked this way.

In terms of holiday trips, nearly three quarters (74%) of trips are booked in this way. Shorter holidays were more likely to have been booked online than longer ones (76% versus 69%).

Figure 6: % of 2015 trips where a firm booking was made – booking method by trip purpose

Table 1.2.33 shows that over three fifths (61%) of firm bookings that were made online were booked on larger devices such as a laptop or desktop PC (which is a lower proportion than the 67% in 2014). Conversely the proportion of bookings made on mobile devices (14% tablet device and 8% smartphone) was higher than in 2014 (12% and 5% respectively).

**Table 1.2.33– Booking online – device used by accommodation booking channel**

### Booking lead times by trips, nights and expenditure

An important area to examine is accommodation booking lead times; the length of time between booking and travelling for GB overnight holiday trips. This question was asked only of those who had made a firm booking ahead of arriving at their trip destination.

Of those GB domestic overnight trips where accommodation was booked, on average it is booked 74.4 days in advance of the trip, around two months and two weeks, and four days longer than in 2014 (see Tables 1.2.34 below). Around three fifths (64%) of trips were booked at least a month ahead of the trip, a similar proportion to 2014. Trips booked at least a month in advance tended to have a slightly higher share of nights (72%) and expenditure (70%), meaning that longer, more expensive trips are more likely to be booked further in advance.

**Table 1.2.34 – Booking lead times by volume of trips, nights and expenditure – Overall GB**

Accommodation booking lead times	Trips		Nights		Expenditure	
	Million	%	Million	%	£million	%
<b>Booked in advance</b>	<b>39.781</b>	<b>100%</b>	<b>137.553</b>	<b>100%</b>	<b>£11,265</b>	<b>100%</b>
More than 6 months before (365 days)	4.019	10%	20.940	15%	£1,433	13%
4-6 months before (150 days)	4.635	12%	22.757	17%	£1,648	15%
2-3 months before (45 days)	9.445	24%	32.843	24%	£2,901	26%
About a month before (30 days)	7.341	18%	21.968	16%	£1,811	16%

<b>Average booking lead time in days</b>	<b>74.4</b>		<b>-</b>		<b>-</b>	

Comparison of individual GB nations (Table 1.2.35) shows they tended to be broadly similar in terms of the proportion of holiday trips booked in advance (GB 70%, England 72%, Scotland 69% and Wales 60%), though holiday trips to Wales were slightly less likely to be booked in advance, as a proportion of all holiday trips.

Trips booked in advance tended to be booked on average over two months prior to the trip. Trips to England tended to be booked further in advance, with an average booking lead time of 75.6 days whereas trips to Scotland and Wales tended to have shorter average booking lead times, at 71.0 days and 72.2 days respectively.

**Table 1.2.35 – Trip volumes by booking lead times and country visited**

<b>Average booking lead time in days</b>	<b>74.9</b>	<b>75.6</b>	<b>71.0</b>	<b>72.2</b>

Table 1.2.36 illustrates that there were notable variations in booking lead times by the different booking channels used for GB holiday overnight trips. Trips where accommodation was booked through a high street or online travel agent or directly through a transport provider tended to see the shortest booking lead times (50.6 days and 55.0 days respectively).

Bookings made directly through a tour operator saw the longest booking lead times, with an average of 109.0 days. Over a third (34%) of these trips was booked at least 4 months in advance of travelling. Bookings made directly through an accommodation provider also had a longer average booking lead time of 72.7.

In 2015 booking lead times were longer for trips booked through tourist boards and tourist information centres compared to 2014, while the average booking lead time fell for trips booked through a high-street or online travel agent.

**Table 1.2.36 – Trip volumes by booking lead times and accommodation booking channel – Overall GB**

Average booking lead time in days (2013)	47.1	95.7	69.6	59.4	65.1

As might be expected, shorter trips tended to have shorter booking lead times, with an average of 53.9 days between booking and travelling for trips that were one to three nights in length (around one month three and a half weeks). Trips of four to seven days had an average booking lead time of 107.4 days (well over three months), while trips of over one week duration had much longer average booking lead times of 146.9 days (nearly five months). All three of these durations are a few days longer than in 2014.

## Accessibility

Respondents were asked whether they or any members of the party during their visit had any disabilities or impairments. More than one in six (17%) trips was made with a member of the party having one or more of these conditions. Long-term illness, mobility impairment (non-wheelchair user) or deafness/partial hearing loss were the most common conditions:

Figure 2.9 – 2015 Disabilities: Percentage of trips where one or more party member has a disability or impairment - All GB trips

The tables below also examine the number of trips, nights and expenditure by the presence of disabilities in the party. Looking across each of the GB nations, the share of trips where a member of the party has a disability or impairment is comparable across each (England 15%, Scotland 15%, Wales 17%). The volume of nights spent on overnight trips for parties of this type was also comparable across each of the nations, though these trips tended to be slightly longer than those where there were no disabilities or impairments in the party, 3.4 nights on average versus 3.0 for those with no disability or impairment. For expenditure too, trips including someone in the party with a disability or impairment saw slightly higher than average expenditure (£215) than for those who did not (£196), which gives a similar price per night. In terms of differences between the nations for these party types, England saw the largest difference in average spend made by parties with a disability or impairment compared to parties without (£211 versus £187). In Scotland the difference was £275 versus £271, and Wales £177 compared to £191, for those trips including someone with a disability or impairment compared to those without.

## Section 1.3 – 2010-15 domestic tourism

### Trends in domestic tourism 2010-15

This section of the report presents the key findings for each year from 2010. Comparing six years of data provides a better understanding of the longer term trends in domestic tourism which are less apparent when comparing 'year-on-year'. The main body of the text focuses on the most recent 2015 time period when compared to 2014. However, any apparent trends over the 2010 – 2015 period are also highlighted.

Please note that the focus is on trips taken by British residents within GB – Northern Ireland as both a destination and an origin has been removed (reflecting the change in the survey coverage from 2011 onwards). Also, please note that all expenditure figures are presented in their original state as collected (historic prices). They do not therefore take account of inflation (in comparison to the expenditure data in Section 1.1 where inflation is taken into account).

### Tourism trips taken in GB

Looking at the longer term trends, domestic tourism saw a significantly more positive performance in 2011 compared to 2010, and continued at a similar level in 2012. 2013 saw a decline of -2.5%, which continued in 2014 with 114.2 million (-7.1% compared to 2013). However, 2015 shows a strong recovery to 124.4 million, with an increase of +8.9%. The average annual change over the six years is now an increase of +1.6%.

The number of nights spent on trips in Britain rose significantly during 2011 compared to the previous year and 2012 saw the level being maintained with a small increase of +0.2%. However in 2013 this level dropped by -3.8% year on year, and in 2014 fell a further -6.4%. In 2015, the number picked up again and increased by +7.9% compared to 2014. This has resulted in an average annual change of +1.0% since 2010.

Expenditure (before taking account of inflation) had been growing between 2010 and 2012, however 2013 saw a drop in spending to £23.3 billion and 2014 saw a fall of -2.6% to £22.7 billion. 2015 has achieved a growth in spending at +9.4% to £24.8 billion. The overall performance of GB trip expenditure over the past six years has resulted in an average annual percentage change of +4.9% since 2010.

### Purpose of domestic trips in GB

Total holiday trips (including those to visit friends and relatives) made up the largest proportion of domestic trips taken in GB, with 85.2 million trips having been taken for this purpose during the period of January to December 2015, an increase of +7.5%. More than two thirds (58.3 million) of these trips were shorter in length, lasting 1-3 nights, so trips lasting four days or longer made up about a third (26.9 million).

Holiday trips in Britain (excluding VFR) have seen an increase in 2015 of +5.8% (to 56.0 million), compared to 2014. Within this, holiday trips lasting over a week declined, while those lasting a week or less grew.

2015 saw an increase in VFR trips, with 46.6 million trips taken, a growth of +9.5%. 16.5 million overnight business trips were taken in 2015, down -8.8% on 2014.

The number of nights spent on British trips grew between 2010 and 2012 peaking with 388.2 million domestic bednights in 2012. However 2013 saw this figure drop to 373.6 million, a decline of -3.8% which was followed by a further decline of -6.4% to 349.5 million in 2014. In 2015, the number of nights spent has increased to 377.1 million, with a +7.9% growth. Across the 2010 to 2015 period the overall average annual percentage change was +1.0%

Total domestic holiday bednights (including VFR) grew between 2010 and 2012 to 282.4 million, but this fell by -1.7% in 2013 and -4.8% in 2014 to 264.4 million. In 2015 however, it has reached 283.1 million with a +7.0% growth. Trips that last for 1-3 nights increased the most, by +8.5%.

There is an increase (+5.3%) in the number of holiday bednights in 2015. The growth is strongest for short holidays, +9.3% higher than 2014 for holidays of 1-3 nights.

The number of nights spent on business trips fell (by -1.2%) to 37.6 million. Nights on visits to friends and relatives increased by +11.1% to 131.3 million.

In terms of revenue, British domestic overnight tourism experienced growth from 2010 to 2012, but 2013 and 2014 both saw declines, -2.8% and -2.6% respectively to give a value for 2014 of £22.7 billion. However, 2015 has reported growth of +9.4%, an average annual rate of growth of +4.9% since 2010.

Expenditure on total holidays (including VFR) declined in both 2013 (-1.8%) and 2014 (-1.0%) to £16.3 billion. In 2015, it showed an increase of +10.0% to £17.9 billion.

Spend on holidays (excluding VFR) was up +8.5% compared to 2014 at £14.2 billion, driven particularly by the increase in shorter domestic holidays, those lasting 1-3 nights (+12.0%).

Spend on trips to visit friends and relatives was also up +13.2% in 2015 to £5.6 billion. However, spend on business trips dropped by -2.1% to £4.0 billion.

### Tourism trips taken in England

As the largest proportion of the overall market, English domestic tourism trips tend to reflect the GB performance. For 2015, the volume of overnight domestic trips to England reached 102.7 million, an increase of +10.9% compared to 2014.

There was also an increase in the number of nights spent in England to 299.6 million (+9.8%) and a +8.2% increase in spend to £19.6 billion.

While the average length of trips in England remained relatively unchanged during the six year period from 2010 to 2015, the value of these trips rose, both in terms of overall spend and spend per night (an average percentage change of +4.6% and +3.4% respectively over the six year period).

**Table 1.3.5 – Tourism trips taken in England (2010-2015)**

## Purpose of domestic trips in England

In 2015 total holiday trips to England (including VFR) rose +9.4% compared to 2014, to 68.9 million, reaching the highest point since 2010. During this time the volume of English holiday trips has changed +1.7% on average. While there were increases across all holiday lengths, the greatest increase was for shorter holidays, lasting 1-3 nights, which constitute the largest part of English holiday trips.

Non-VFR holidays rose by +7.3% to 43.7 million compared to 2014, and again, the shorter trips of 1-3 nights saw the largest increase, growing by +10.2%. English VFR holiday trips grew at a faster rate of +13.2% to 25.2 million.

The total for VFR trips in 2015 was +12.9% higher than seen in 2014, at 40.5 million, showing signs of recovery from a trend of decline seen since 2012.

In contrast to the overall GB performance, business trips in England have increased by +2.4% compared to 2014.

### Tourism trips taken in Scotland

The volume of trips taken in Scotland during 2015 decreased by -4.2% compared to 2014, falling to 12.0 million trips. On average, there has been no change in volume across the period 2010 to 2015.

The length of trips in Scotland has fluctuated since 2010 but has risen by +3.9% compared to 2014, with 3.45 nights being spent on average. After a period of remaining stable between 2011 to 2014 there have also been increases for the average spend per trip (+19.7% to £274) and average spend per night (+14.5% to £79), and these measures have grown on average by +5.9% and +6.7% respectively each year since 2010.

## Purpose of domestic trips in Scotland

Overall, the volume of total holiday trips taken in Scotland fell during 2015, decreasing by -2.3% to 8.7 million. The volume of shorter trips, which make up the larger part of Scottish holiday trips, fell -8.9%, however, the volume of this type of trip has grown +4.4% on average during the period 2010 to 2015.

Holiday trips (excluding VFR) followed a slightly different pattern, with a +1.0% increase over 2014, driven by an increase in mid-length holidays of 4 to 7 nights, which grew by +8.5% to 2.1 million in 2015. The average annual rate of change for holiday trips between 2010 and 2015 in Scotland was +2.9%.

In contrast to trips taken only for holiday purposes, VFR trips to Scotland fell by -14.3% during 2015, accounting largely for the overall fall in trips to Scotland since 2014. Non-holiday VFR trips saw the larger decline, falling by -20.8% to a volume of 1.2 million in 2015. This may however, be a readjustment in volumes after 2014, when a multitude of events and activities such as the Commonwealth Games and Homecoming contributed towards increases in domestic overnight tourism in Scotland.

Business trips taken in Scotland continue to decline, falling by -9.9% to 1.7 million, the lowest volume seen during the period of 2010 to 2015. During this period the volume of business trips has fallen -4.5% per annum overall.

### Tourism trips taken in Wales

Overnight domestic tourism trips in Wales reached the highest point for six years in 2015 rising +4.5% 10.4 million trips. Overall, the volume of these trips has increased +3.9% on average since 2010.

The volume of bednights also increased during 2015, by +3.2% to 35.2 million, though at a slower rate than the volume of trips. This leaves the average trip length -1.3% shorter in duration than was the case in 2014 at 3.46 nights.

The increase seen for expenditure on these trips, up by +13.8% to £2.0 billion, has also resulted in a higher average spend per trip (+9.3% to £189) and per night (+11.4% to £55).

**Table 1.3.9 – Tourism trips taken in Wales (2010-2015)**

### Purpose of domestic trips in Wales

In 2015, Wales saw an increase in the volume of overnight holiday trips taken, rising +2.7% compared to 2014, to 8.2 million. This continues a trend of growth for this type of trip since 2010 and the volume has grown by an average of +3.5% per year during this period.

It has been shorter holiday breaks of 1 to 3 nights which have been the main drivers of this increase, rising by +6.6% during 2015, while the volume of mid-length breaks (4 to 7 nights) fell by -3.8%. The other factor behind the increase in holiday trips has been an increase in VFR holiday trips, which rose by +20.0% compared to 2015.

Also contributing to the overall increase in overnight trips within Wales in 2015 was a rise in business trips, which increased by +69.7% to just under one million trips.

In contrast, trips that were taken purely for the purpose of holidays and non-holiday VFR trips fell in volume, by -1.7% and -30.2% respectively. Over the period of 2010 to 2015, however, the volumes of both of these types of trip have increased on average across the six year period.

## Expenditure during 2015

This section examines the breakdown of domestic tourism expenditure; first at a GB level between 2010 and 2015 (for all tourism and holidays) then at the country level (comparing 2014 with 2015 for all tourism and holidays).

When a survey respondent is interviewed, they are asked to specify how much money they spent on their trip within eight categories:

- Price of package holiday/inclusive trip
- Accommodation
- Travel costs to and from destination, and during the trip
- Services or advice (e.g. travel guides, tourist information)
- Buying clothes
- Eating and drinking out
- Other shopping
- Entertainment

Although it can be informative to compare total spend when broken down into these categories, the results should be interpreted with caution due to the smaller sample size at this level.

*Note: It is also important to emphasise that, as in the previous section, the 2010 to 2015 figures are in historic prices and have not been converted to take account of inflation.*

Table 1.3.11 below illustrates total spending on domestic overnight trips within GB between 2010 and 2015.

In 2015, £24.8 billion was spent on GB domestic overnight tourism, marking an increase of +9.4% in spending. This reverses the trend of decline in recent years and for the period of 2010 to 2015, overall, spending has increased by +4.9% on average.

Accommodation remains the largest item of expenditure, constituting over a third of spend (35%). Worth around £8.6 billion during 2015 and with an increase of +6.6%, expenditure on accommodation has risen steadily since 2010. Spend on travel has the second largest share of the trip value at 19%, and has also seen an increase during 2015 by +5.1% to £4.8 billion. The only item of expenditure that did not increase in value over 2015 was services or advice (e.g. travel guides, tourist information), which dropped -1.8% and has seen an annual decline of -14.3% since 2010.

### British expenditure for holidays (excludes VFR-holiday)

During 2015, the value of GB domestic holidays (excluding VFR) rose by +8.5% to be worth £14.2 billion, breaking a recent downward trend. The period for 2010 to 2015 has typically seen an overall increase, with average year-on-year change standing at +2.5%.

Reflecting the profile of expenditure on all GB domestic trips, accommodation has the largest share of spend at nearly two fifths (38%). The value of this item was worth £5.4 billion during 2015, an increase of +6.2% compared to the previous year. Increases have been across all items of expenditure on these holiday trips, except for package/inclusive holiday trips, which has fallen by -5.0% over 2015, and has seen a negative average annual growth of -2.0% since 2010.

### Total spending on domestic overnight trips within England between 2013 and 2015

In line with the performance of overall GB trips, the expenditure on overnight trips in England increased during 2015, reaching a value of £19.6 billion. Holiday trips accounted for more than half of this value at £10.7 billion.

Spend on accommodation, the largest item of expenditure on English overnight trips, has increased by +6%, continuing a trend of growth since 2013. As seen for all GB overnight trips, expenditure on English trips has increased for most of these items apart from services or advice (e.g. travel guides, tourist information), which fell by -7% compared to 2014. All items of expenditure on English holiday trips have increased since 2014, with the exception of package/inclusive trips (-21%), again, reflecting the pattern seen for GB holiday trips overall.

### Total spending on domestic overnight trips within Scotland between 2013 and 2015

Both overall and holiday domestic trips in Scotland saw an increase in expenditure during 2015, increasing by +14% and +19% respectively. Scottish trips taken during 2015 were worth £3.3 billion, with holiday trips making up a large proportion of this value at £2.1 billion.

Most of the expenditure categories rose in value for Scottish overnight trips, apart from package/inclusive trips, which fell by -30% compared to 2014. For Scottish holiday trips, however, several areas of expenditure saw declines in value, including accommodation (-1%), travel (-22%), eating and drinking out (-3%) and buying clothes(-22%).

**Table 1.3.14 – Tourism expenditure breakdown in Scotland (2013-15)**

	All domestic tourism				Domestic holidays

### Total spending on domestic overnight trips within Wales between 2013 and 2015

Expenditure on Welsh domestic tourism trips continued its upward trend, with an increase of +14% during 2015. Although holiday trips in Wales make up more than two thirds of the overall value of Welsh trips, their value grew at a slightly slower rate of +7%.

Travel (+6%), package/inclusive trips (+108%) and shopping (buying clothes +38% and other shopping +44%) appear to be driving much of the increase, although a number of expenditure items for Welsh holiday trips have fallen in value since 2014. These include accommodation, services or advice (e.g. travel guides or tourist information), and entertainment.

**Table 1.3.15 – Tourism Expenditure Breakdown in Wales (2013-15)**

## Holidays taken in GB by lifestage

This section examines the trends and characteristics of holiday tourism and how it varies by lifestage. The number of trips and the percentage change between years has been illustrated for GB and each constituent country between 2010 and 2015.

British adults have been defined into four categories:

Lifestage	
<b>Pre-nesters</b>	Under 35 years and no children
<b>Families</b>	All ages and with children
<b>Older Independents</b>	35-54 years and no children
<b>Empty Nesters</b>	55+ years and no children

Of the 56.0 million holiday trips taken in Britain during 2015, Families represent the largest segment, with 19.6 million trips taken, although Empty Nesters account for nearly as many trips, with 19.0 million (see Table 1.3.16 below). The volumes of trips taken by all types of holiday-makers have increased since 2014. The increase in family trips of +5.7% represents a change in direction, as this group had seen a decline in holiday trips since 2012. The uplift in family holiday trips accompanies an increase in holiday trips overall.

**Table 1.3.16 – Holiday tourism trips taken in GB by Lifestage (2010-2015)**

	2010	2011	% change (10-11)	2012	% change (11-12)	2013	% change (12-13)	2014	% change (13-14)	2015	% change (14-15)	Average annual % change 10-15

## Holidays taken in England by Lifestage

In England, again Families and Empty Nesters account made up the largest share of holiday trips (see Table 1.3.17 below). Also reflecting the overall GB picture, each of the lifestage types saw an increase in volume of holiday trips during 2015. The longer term view across 2010 to 2015 shows that on average, annual growth has remained flat for Families and Pre-Nesters, while Empty Nesters have seen an annual increase of +1.6% on average, while trips taken by Older Independents have declined by -1.4% on average.

**Table 1.3.17 – Holiday tourism trips taken in England by Lifestage (2010-2015)**

	2010	2011	% change (10-11)	2012	% change (11-12)	2013	% change (12-13)	2014	% change (13-14)	2015	% change (14-15)	Average annual % change 10-15

### Holidays taken in Scotland by Lifestage

Differing from the GB and England profile, Empty Nesters are the largest group taking trips in Scotland, making up nearly two fifths (39%) of trips (see Table 1.3.18). This group has seen a +19.2% increase in volume of trips taken during 2015, but this increase was offset by declines for the Family group and Older Independents, which saw declines of -10.0% and -12.4% respectively. Since 2010, the volume of trips taken by Empty Nesters has increased by an average of +7.7% each year, making them the fastest growing lifestage groups for domestic tourism in Scotland.

**Table 1.3.18 – Pure holiday tourism trips taken in Scotland by Lifestage (2010-2015)**

	2010	2011	% Change (10-11)	2012	% Change (11-12)	2013	% Change (12-13)	2014	% change (13-14)	2015	% change (14-15)	Average annual % change 10-15

### Holidays taken in Wales by Lifestage

As was the case in England, Families and Empty Nesters made up the majority of holiday trips in Wales during 2015, representing 36% and 33% of Welsh holiday trips respectively (see Table 1.3.19 below). Both of these groups, however, have seen a decline in trip volumes since 2014, falling by -8.3% and -7.0% respectively. In both cases, this latest performance follows a fluctuating trend but overall for the period between 2010 and 2015, Families has seen an average annual decrease of -1.2%, while the numbers of Empty Nesters have risen overall, with an average annual increase of +7.2%.

## All tourism in Great Britain

British residents made an estimated 124 million overnight trips in Great Britain in 2015, representing 377 million bed nights and £25 billion in spending.

Total holidays (including visiting friends and relatives) are the main purpose of trips taken, accounting for two thirds (68%) of trips taken and are even more important in terms of nights (75%) and spending (72%). Visits to friends and relatives (VFR) for mainly holiday purposes account for one in four trips and nights away (23%) but are less significant in terms of spending (15%). Business and work is the main purpose for around one in eight trips (13%), accounting for one in nine nights (10%). These are higher spending trips, accounting for 16% of all tourism spending.

Friends' and relatives' homes (including owned second homes) are a widely used type of accommodation accounting for almost four in ten of all trips (37%). This reflects not only visits to friends and relatives as such, but also holidays spent staying with friends and relatives. With no real accommodation costs, trips staying at friends' and relatives' homes account for only 19% of spending on all tourism trips.

Commercial accommodation is used on just over half of trips (58%), but these trips represent a much higher share of spending (75%). Commercial accommodation is mainly serviced (40% of trips) where trips tend to be shorter in duration (28% of nights) but higher spending (51%). Hotels and motels account for 34% of trips and 44% of spend; guest houses and B&Bs account for 6% of trips and 7% of spend. Self-catering rented accommodation is used on a lower volume of trips (19%), but these trips are longer (27% of nights) and therefore slightly above average in terms of spending (24%).

The car is the dominant form of transport with three quarters (74%) of trips using a private car for the longest part of the journey from home to the destination

Firm bookings are made before more than half of all trips (57%), but it would be higher were it not for the high level of staying at friends and relatives' homes and using personal transport, where advance booking is less relevant

Large cities/large towns (41%) are the major destinations of tourism trips, with small towns, the seaside and countryside/villages representing the remainder with a share of 20% each.

## Holiday trips in Great Britain

Tables 2.2a – 2.2c below are based on holidays (excluding VFR). Visits to friends and relatives, which are described by the respondent as being mainly a holiday rather than for some other reason, are included further below in Tables 2.3a – 2.3c.

British residents made 56 million holiday trips in Great Britain in 2015. Short holidays of 1-3 nights in length accounted for a 65% share whilst long holidays of 4+ nights or more accounted for a smaller share (35%).

The commercial accommodation sector accounts for four in five holiday trips (80%), with the share for short trips (81%) and long trips (78%) being at similar levels. Self-catering accommodation (mainly cottages and caravans), account for 56% of longer trips, and 24% of shorter trips.

The car is the dominant mode of transport used for the longest part of the journey to the destination (79%). Public transport is used for 17% of holiday trips.

Firm bookings were made before going on holiday for over two thirds of holiday trips (70%).

Holiday trips are taken to a wide range of destinations. 36% of short trips are taken to large cities/towns whereas 43% of longer trips are taken to the seaside.

The summer months see the largest share of holiday trips, with July and August accounting for just under a third (29%) of holiday trips.

## Holiday bed nights in Great Britain

This section covers holiday tourism (excluding VFR) in terms of bed nights. As evident in recent years, the overall pattern is very similar to that for trips, but some differences are highlighted below.

Furthermore, some clear patterns emerge between short and long holidays.

Serviced accommodation is less important in terms of nights (31%) than it is for trips (46%). This is reflected in the share of bed nights based on the duration of the holiday with serviced accommodation accounting for a 52% share of short trips and a 19% share of longer trips. In contrast, self-catering accommodation accounts for 56% of bed nights on longer trips but only 28% on short trips.

The seaside accounts for 37% of holiday nights, a smaller share of shorter trips (29%) than long trips (42%). In contrast, trips within large towns and cities represent a larger share of bed nights on shorter trips (31%) when compared to longer trips (14%).

There is a strong summer seasonal peak in terms of nights, with 35% of nights taken in July and August. July and August account for an even larger share of bed nights on longer trips (40%) than for short trips (25%) reflecting the fact that many tourists take their main holiday during these summer months.

## Holiday spending in Great Britain

This section covers holiday tourism (excluding VFR) in terms of spending. The overall pattern, as evident in recent years, is very similar to that for trips and nights. Key differences between short and long holidays have been highlighted below.

Serviced accommodation (principally hotels) is slightly more important in terms of spending (49%) than trips (46%) or especially nights (31%), particularly spending on short trips (58%). Self-catering accommodation is more popular on longer trips, accounting for over half of the share of spend (56%).

Firm bookings made before going on trips account for a 79% share of all spend. There is little difference between the share of spend for short trips vs long with firm bookings accounting for 78% of short and 81% of long trips.

The share of overall holiday expenditure for those staying in their own homes or homes of friends or relatives is lower (7%) compared to its share of trips (12%) and nights (12%). As with firm bookings, there is little difference in share of expenditure between short and long trips where the accommodation is in a home, accounting for 6% of short trips and 8% of longer trips.

Note: \*Top 25 activities undertaken on trip illustrated in Table 2.2c above. Sorted by frequency of GB all holiday spend.

## Visits to friends and relatives (VFR)

Tables 2.3a – 2.3c illustrate the value and volume of trips, bed nights and expenditure for visits to friends and relatives. These trips are further split by visits to friends and relatives which are described by the respondent as being mainly a holiday and visits to friends and relatives for some other reason.

British residents made 47 million VFR trips within Great Britain in 2015. 29 million of these trips were VFR-holiday trips (63%) and the remaining 16 million were VFR-other trips (37%). VFR-other trips tended to be shorter (2.48 nights on average versus 3.03 for VFR-holiday) and spread more evenly across the year.

As would be expected, the majority of VFR trips involve staying in own homes or homes of friends and relatives (79% of trips), however this is not always the case, with a fifth (22%) using commercial accommodation.

As with other types of tourism, the private car is the most widely used transport type for the journey to the destination (75% of trips).

Large cities/large towns and small towns are the main types of destination for VFR trips (45% and 28% respectively), reflecting the population distribution.

VFR trips are spread fairly evenly throughout the year, albeit with a peak in December (17%), reflecting the Christmas period.

Some 15% of VFR trips are made by 16-24 year olds, a greater proportion than for All Tourism, where only 11% of trips are made by this youngest age-group.

## VFR bednights in Great Britain

This section covers VFR bednights of which there were 131 million during 2015. 89 million of these (67%) were to visit friends and relatives whilst on holiday.

Staying in own homes or homes of friends and relatives is slightly more important when expressed in bed nights (81%) than it is for when expressed in terms of trips (79%).

The majority (60%) of VFR bednights were taken without a firm booking.

Reflecting the popularity of visiting friends and relatives over the Christmas period, December accounted for a 20% share of all bednights, a higher share than for trips (16%).

Notes: \*Top 25 activities undertaken on trip illustrated in Table 2.3b above. Sorted by frequency of GB all VFR nights.

## VFR spending in Great Britain

The overall pattern for VFR spending is consistent with trips and bed nights. These types of trips are less reliant on commercial accommodation (accounting for a 38% share of spend) with friends and relatives homes the most popular type of accommodation (60% share of spend).

Trips to large cities and towns and small towns accounted for a 70% share of all VFR spend, reflecting the large population bases in built up conurbations where most of these trips are taken.

Short trips (1-3 nights) accounted for a 66% share of spend – this was particularly so for VFR-other trips (75%). In contrast, VFR-holidays accounted for a larger share of spend for trips that lasted between 4-7 nights (29% compared to 9% for VFR-other trips).

**Table 2.3c – VFR spend in GB**

	All VFR spend				VFR-holiday spend				VFR-other spend

## Table 2.4 – Business and work tourism in Great Britain

British residents made 16 million overnight business and work trips within Great Britain in 2015. This represents 38 million bed nights and £4 billion expenditure.

Commercial accommodation is used for the vast majority of business trips (83%), predominantly hotels and motels (72%). However it is worth noting that nearly one in ten of business and work trips involve staying in their own second homes or those of friends' and relatives (10%).

Cars are the main form of transport used for the journey to the destination (59% of trips). Public transport is used for a third of business and work trips (33%) – especially the train (24%).

Business and work trips tend to be relatively short, with nearly half involving only one night away from home (48%).

Almost half (52%) of trips are taken by those in the professional and managerial (AB) socio-economic group.

Note: \*Top 25 activities undertaken on trip illustrated in Table 2.4 above. Sorted by frequency of GB all business trips.

## Table 2.5 – All tourism – Destination and purpose

This section provides a regional breakdown of tourism volume and value in 2015.

The relative 'strengths' of individual English regions include:

- Holidays – South West
- VFR – South East
- Business – London

**Great caution should be exercised when using data from tables 2.5 to 2.8 below, as some smaller geographies are based on limited sample sizes and are therefore subject to much wider margins of error than the national data.**

## GB Tourist 2015

# Appendix

## Definitions of terms used

Most terms used in this report will be familiar to users of tourism data without further explanation. However, definitions of the main terms used in the report are provided below for reference.

### Trips

The estimated number of tourism trips made by adults aged 16 and over and by children up to the age of 15 who accompany them. A trip must consist of at least one night spent away from home, has no upper limit (unlike in the previous versions of the survey where a maximum limit of 60 nights was imposed), and has its end marked by the respondent's return to home. However, the reported timing of trips is reported on the basis of the start date of individual trips. This start date approach is consistent with previous methodologies.

Not included are 'unaccompanied child trips' – trips taken by children up to the age of 15 when not accompanied by an adult.

### Bednights

The estimated number of nights spent away from home by adults and by children accompanying them on tourism trips.

### Spending

The estimated expenditure incurred relating to all tourism trips. This includes all expenditure by adults on the trip both for themselves and for other people for whom the adults paid (for example, children). This covers those costs incurred in advance of the trip, costs paid during the trip itself, and also any bills relating to the trip paid after returning home. Costs paid on behalf of the person taking the trip, for example by an employer paying the cost of a business trip, are also included.

Expenditure includes items such as package holidays, accommodation, travel to and from the destination and during the trip, services and advice, buying clothes, eating and drinking out, shopping, entertainment and other items relating to the trip.

### Allocation of spending

When spending is reported by country of destination, all of the spending is allocated to the relevant country of destination. In reality, not all of the spending may take place in the country of destination. For example, travel costs or inclusive trip charges may be incurred in the country of origin rather than the country of destination. No attempt has been made in this report to adjust for this.

Where a trip involves overnight stays in more than one destination, the expenditure for the trip is allocated to each destination proportionally to the number of nights spent in each destination.

### Holiday

'Holiday' indicates trips where the main reason for taking the trip is described by the respondent as "holiday, leisure or pleasure" (with no visiting friends or relatives element to the trip).

### Total holiday (including VFR holiday)

'Total Holiday' includes trips where the main reason for taking the trip is described by the respondent as "holiday, leisure or pleasure" and also trips where the main reason for taking the trip is initially described as "visiting friends and relatives", but which on subsequent probing is also described as a holiday.

## **VFR**

'Visiting friends and relatives' or 'VFR' is the term used for trips where the main reason for taking the trip is described as "visiting friends and relatives". It can be split further, into two sub-categories. VFR-holiday, is where the main reason for taking the trip is initially described as "visiting friends and relatives", but which on subsequent probing is also described as a holiday. VFR-other, is where the main reason for taking the trip is described as "visiting friends and relatives" mainly for some reason other than a holiday.

## **Business/work**

'Business/work' trips are those trips where the main reason for taking the trip is described as "to do paid work/on business", "to attend a conference" or "to attend an exhibition, trade show or agricultural show".

## **Other purposes**

This covers all trips for purposes other than holiday, VFR and business/work as described above. It includes trips where "travel/transport is my work" (such as those made by overnight delivery drivers), and trips made for educational, social, sporting and personal or family reasons (such as attending weddings and funerals, taking someone to university, and similar reasons).

## **Great Britain**

Great Britain as a destination in this survey includes England, Scotland, Wales, the Isle of Man and the Channel Islands.

## **Commercial accommodation**

Commercial accommodation is the total of serviced and self-catering rented accommodation. So it includes hotel, motel, guest house, farmhouse, bed & breakfast, and holiday camp/village with any meals provided. Rented flat /apartments, rented house/chalet/villa/bungalow/cottage without any meals provided, self-catering holiday camp/village, camping, towed caravan and static caravan which is not owned.

## **Serviced accommodation**

Serviced accommodation includes hotel, motel, guest house, farmhouse, bed & breakfast, and holiday camp/village with any meals provided.

## **Total self-catering rented accommodation and caravan and camping**

Total Self-catering rented accommodation and Caravan and Camping includes rented flat /apartment, rented house/chalet/villa/bungalow/cottage without any meals provided, self-catering holiday camp/village, camping, towed caravan and static caravan which is not owned.

## **Self-catering rented accommodation**

Self-catering rented accommodation includes rented flat /apartment, rented house/chalet/villa/bungalow/cottage without any meals provided and self-catering holiday camp/village.

## **Caravan and camping accommodation**

Caravan and camping accommodation includes camping, towed caravan, static caravan which is not owned and static caravan which is owned.

### **Other types of accommodation**

Other types of accommodation cover all accommodation types not included under rented accommodation above. It includes friends' or relatives' home, static caravan which is owned, second home or timeshare which is owned, hostel, university or school, boat, sleeper cab of lorry/truck, transit and any other type of accommodation.

### **Personal transport**

Personal transport includes own/friend's/firm's car, hired car, motorised caravan/camper/dormobile, motor cycle and bicycle.

### **Public transport**

Public transport includes train, regular bus/coach, organised coach tour, plane, boat or ship.

### **Inclusive trip**

Inclusive trip is defined in the questionnaire as "a package or inclusive trip – that is, where you paid a single price for accommodation plus some form of transport".

### **Type of location**

The classification of type of location as 'seaside', 'large city/large town', 'small town' or 'countryside/village' is a subjective assessment made by the respondent by selecting from these four options.

### **Touring**

A 'touring' trip is defined in the questionnaire as "a touring holiday, where you moved around spending nights in different places".

### **Children on trip**

Children on trip means that at least one child aged up to 15 was part of the group for all or part of the trip.

### **Socio-economic group (social grade)**

This classification is derived from the occupation of the Chief Income Earner in the respondent's home, and is based on the system used by the National Readership Survey (NRS). It is generally used in market research in the UK and consists of six social grades:

<b>Grade</b>	<b>Occupation</b>
<b>A</b>	Higher managerial, administrative or professional
<b>B</b>	Intermediate managerial, administrative or professional
<b>C1</b>	Supervisory or clerical, and junior managerial, administrative or professional
<b>C2</b>	Skilled manual workers
<b>D</b>	Semi and unskilled manual workers
<b>E</b>	State pensioners or widows (with no other earners in household), casual or lowest grade workers

It is important to note that this classification is actually based only on the adult respondent interviewed about the trip, rather than all people taking the trip. While technically this characteristic only relates to the individual, it can in practice be interpreted as applying to all people on the trip. Those on the trip will generally be people in the same household who would be therefore be allocated the same social grade.

### Age of respondent

Information on age is obtained for the respondent being interviewed about the trip, but no information is obtained for other adults or children accompanying on the trip.

In tabulating the results, the characteristics of the individual reporting the trip are applied to other trip members, although in reality these other trip members will have different characteristics. Information on age characteristics must therefore be interpreted with caution.

### Lifestage of respondent

'Single' includes widowed, separated, divorced and civil partnerships that have terminated. 'Married' includes married and living with partner. As with age, this information is based on the characteristics of the respondent being interviewed about the trip and is not available for the other trip members. The lifecycle characteristics of the respondent are applied to all trip members, although in reality their own characteristics will be substantially different. Information on lifecycle must therefore be interpreted with caution.

### Regions

Regions of England, Scotland and Wales shown in this report are defined as follows:

England	
<b>Cumbria</b>	County of Cumbria
<b>Northumbria</b>	Northumberland, Durham, Tyne & Wear, Tees Valley
<b>North West</b>	Lancashire, Merseyside, Greater Manchester, Cheshire
<b>Yorkshire</b>	North Yorkshire, West Yorkshire, South Yorkshire, East Riding of Yorkshire, Kingston upon Hull, North Lincolnshire, North East Lincolnshire
<b>Heart of England</b>	Staffordshire, Shropshire, West Midlands, Warwickshire, Herefordshire, Worcestershire, Gloucestershire (except South Gloucestershire), Derbyshire, Leicestershire, Northamptonshire, Nottinghamshire, Rutland, Lincolnshire
<b>East of England</b>	Norfolk, Suffolk, Cambridgeshire, Essex, Bedfordshire, Hertfordshire
<b>London</b>	Greater London
<b>South West</b>	Cornwall, Devon, Somerset, Wiltshire, Western Dorset, South Gloucestershire
<b>Southern</b>	Hampshire, Isle of Wight, Eastern Dorset, Berkshire, Buckinghamshire, Oxfordshire
<b>South East</b>	Kent, Surrey, East Sussex, West Sussex

In most of the English level analysis, the above regional destinations are also combined, where appropriate, to allow analysis at a regional level.

- West Midlands
- East England
- East Midlands
- London
- North West
- North East
- South East
- South West
- Yorkshire

Scotland	
<b>Grampian</b>	Aberdeen City and Shire
<b>Tayside</b>	Dundee, Perth & Kinross, Angus
<b>Edinburgh and East Central</b>	Edinburgh, the Lothians, Fife, Clackmannanshire, Falkirk, Stirling
<b>South of Scotland</b>	Borders, Dumfries and Galloway
<b>Glasgow and West Central</b>	Glasgow, Renfrewshire, East Renfrewshire, Inverclyde, East and West Dunbartonshire, North South and East Ayrshire and North and South Lanarkshire
<b>Highlands and Islands</b>	including Argyll & the Islands, Caithness and Sutherland, Inverness and East Highlands, Lochaber, Moray, Orkney, Shetland, Skye and Wester Ross, and Inne Gall

Since 2007, the primary Scottish levels analysis has been at the newly defined macro-tourism areas:

- **Scotland – North** – (Highlands & Islands, Aberdeen & Grampian, Western and Northern Isles)
- **Scotland – West** – (Argyll, The Isles, Loch Lomond, The Trossachs + Glasgow & Clyde Valley, Ayrshire & Arran)
- **Scotland – East** – (Perthshire + Angus & Dundee + Kingdom of Fife + Edinburgh & Lothians)
- **Scotland – South** (Dumfries & Galloway + Scottish Borders),
- **Edinburgh**
- **Glasgow**

Wales	
<b>North Wales</b>	Anglesey, Conwy, Denbighshire, Flintshire, Wrexham, Gwynedd North (former Arfon and Dwyfor)
<b>Mid Wales</b>	Ceredigion, Powys, Gwynedd South (Meirionnydd)
<b>South West Wales</b>	Neath/Port Talbot, Carmarthenshire, Swansea, Pembrokeshire
<b>South East Wales</b>	Bridgend, Rhondda Cynon Taf, Merthyr Tydfil, Caerphilly, Blaenau Gwent, Torfaen, Vale of Glamorgan, Cardiff, Newport, Monmouthshire

#### Levels of statistical confidence

	Trips %	Nights %	Spend %
<b>GB</b>	2.5%	3.0%	3.6%
<b>England</b>	2.8%	3.2%	4.0%
<b>Scotland</b>	6.3%	8.1%	8.3%
<b>Wales</b>	5.3%	8.0%	9.1%

It must be emphasised that sampling variation is not the only possible source of error. Others include bias through non response and measurement errors caused by memory distortion and/or lack of knowledge of the respondent. These are not quantifiable and can affect the survey results. In particular it is often difficult for respondents to recall expenditure on trips with high levels of accuracy. Nevertheless, it is possible to state, for example, that assuming no bias, the true value of the number of GB trips in 2014 will lie in the range of plus or minus 2.5% of the estimate on 95% of occasions.

## Great Britain – Resident population

This table describes the characteristics of adults resident in Great Britain which formed the basis for the weighting of the sample survey. These 2014 figures are the latest available.

### Great Britain adult population

Total adult population	49484	Total adult population	49484
<b>Age by sex</b>		<b>Government office regions</b>	
Male 16-24	3601	North East	2115
Male 25-34	4284	North West	5640
Male 35-44	3935	Yorkshire & Humber	4275
Male 45-54	4227	East Midlands	3706
Male 55-64	3379	West Midlands	4449
Male 65-74	2739	East of England	4732
Male 75-84	1538	London	6598
Male 85+	502	South East	6884
		South West	4319
Female 16-24	3433	Wales	2451
Female 25-34	4084	Scotland	4315
Female 35-44	3979		
Female 45-54	4350	<b>Presence of children</b>	
Female 55-64	3525	Yes	14037
Female 65-74	2985	No	35447
Female 75-84	1960		
Female 85+	963	<b>Social grade</b>	
		AB	12570
<b>Car ownership</b>		C1	13858
1	20895	C2	10419
2+	18342	D	7656
0	10247	E	4981

Note: The values above were derived from:  
A. Census 2011  
B. 2010 based Population Projections for 2014  
C. BARB Establishment Survey 2008 & 2012
