

Great Britain Tourism Survey

December 2017

Long term trends: How to compare data collected from January 2016 onwards with data collected in December 2015 and before

The introduction of a new data processing approach in January 2016 had an impact, albeit small, on the reported estimates for trips, nights and expenditure.

This change also impacted trends and the ability to conduct long-term analysis. Therefore caution should be taken when comparing data from January 2016 onwards with data in December 2015 and before. Where relevant, trend breaks have been clearly marked either with asterisk or a dotted line to indicate where users should be cautious.

As 2016 and 2017 use the same data processing approach, 2017 data can be compared to 2016 data without any concern. Similarly collected any data before December 2015 can be compared with any other data collected prior to December 2015 without any concern.

For more information please see: <https://www.visitbritain.org/about-gbts-and-gbdvs>

Summary of Results GB And England

	Trips	Nights	Spend	Headlines
December 2017				
	+5%	+12%	+3%	<ul style="list-style-type: none">There were 10.8 million domestic overnight trips in GB in December 2017, which is up from 10.4 million trips in December 2016.Expenditure increased by +3% to £1.7 billion, while the number of nights increased by +12% to 35.0 million.
	+6%	+15%	+11%	<ul style="list-style-type: none">There were 9.3 million domestic overnight trips to England in December 2017, up by +6% on the same month last year.Spend increased by +11% to £1.4 billion, while bednights increased by +15% to 29.6 million.
YEAR-TO-DATE				
	+1%	+3%	+3%	<ul style="list-style-type: none">In the year to December 2017, GB trips were up +1% to 120.7 million, compared to 119.5 million in the same period in 2016.Nights were up by +3% for the year-to-date at 369.5 million, while spend increased for the year to date by +3% at £23.7 billion.
	+1%	+4%	+3%	<ul style="list-style-type: none">In the year to December 2017, trips to England increased by +1% to 100.6 million, compared to 99.3 million in the same period in 2016.Nights increased by +4% to 299.4 million, while spend increased by +3% for the year to date.

Weather

Context

- December was an unsettled month which started mild and cloudy before Storm Caroline arrived on the 7th bringing windy weather. From the 8th-16th there was a cold wintry spell with widespread frosts, which was followed by a mild spell for most between the 17th-25th. Towards the end of the month there were further strong winds brought by Storm Dylan.

Summary of Results England

YEAR-TO-DATE (January-December 2017)

Trip Characteristics

	Trips	Nights	Spend	PURPOSE
	+6%	+7%	+6%	<ul style="list-style-type: none"> HOLIDAY TRIPS in England from January to December 2017 increased by +6% compared to the same period last year, with 47.2 million trips recorded. Expenditure increased by +6% to £11.0 billion, while nights increased by +7% to 157.8 million.
	-1%	+4%	+1%	<ul style="list-style-type: none"> VISITS TO FRIENDS AND RELATIVES decreased by -1% to 36.6 million, with bednights up by +4% and expenditure up by +1%. Non-holiday VFR trip volume decreased by -1% and holiday VFR trips decreased by -1%.
	0%	0%	-2%	<ul style="list-style-type: none"> BUSINESS trips remained stable for the January to December period at 14.2 million. Nights were at a similar level to in 2016, whilst spend decreased compared to the same period in 2016, by -2%.
	25-34	55+	C2	TRIP TAKERS
	+7%	+3%	+5%	<ul style="list-style-type: none"> The greatest increase in trip taking amongst different age groups between Jan-Dec in England was for those aged 25-34 and 55+. Trips increased by +7% for 25-34s and by +3% for those aged 55+. The C2 social class group saw a +5% increase in trips taken between January to December compared to the same period in 2016. All other groups saw an increase, except ABs which stayed at a similar level.
	North West	Yorkshire & Humber	North East	DESTINATION TYPE
	+14%	+15%	+7%	<ul style="list-style-type: none"> North West, Yorkshire & Humber, and North East saw the greatest increases in trips taken between January and December – trip taking increased by +14%, +15%, and +7% respectively compared to the same period in 2016. There was a decrease in trips to seaside and small towns but an increase to countryside / village and cities for the January to December period compared to the same time in 2016.

Attractions

Accommodation

TOURISM BUSINESS MONITOR

↗

↗

- Attractions and accommodation businesses reported a varied performance for the period of mid-July until the end of the Summer holidays. Slightly more attractions reported increased visitor numbers than did this time last year, but the proportion reporting a decline was also higher. 40% of accommodation business reported higher visitor numbers than during the same time in 2016. This, however, is lower than the figure observed for the year so far.

Note about these results:

The GB Tourism Survey is a survey of British residents, in which 2000 respondents are interviewed each week, making a total of 100,000 each year.

Any respondent having taken one or more overnight trips in the previous 4 week period is asked to describe the details of trips taken. Each year, data from around 17,000 trips is collected, and this is subsequently grossed up to provide population estimates. Full details of the survey methodology can be found at: <https://www.visitbritain.org/archive-great-britain-tourism-survey-overnight-data>

On an annual basis, the survey is extremely robust, with a confidence level for England data at +/- 3% at the 95% level for the number of trips and nights measured, and +/- 4% for the expenditure figure.

For shorter time periods and for other subsets of the data such as region or trip purpose, the margin of error is wider – guidance on confidence intervals at national and regional level for annual and quarterly data is provided on the next page.

For any questions about data interpretation, please contact VEResearch@visitengland.org
